POINCARE AND HIS WHOLE CABINET RESIGN

DEFEAT AND THE RESIGNATION ON A MINOR ISSUE

LONG AFTER POINCARE HAD SURVIVED STORMS OF CRITICISM

GOVERNMENT'S PENSION BILL MADE QUESTION OF CONFIDENCE IN GOVERNMENT

(By United Press)

Paris, March 26—Premier Poincare today presented the resignation of his cabinet to President Millerand.

Defeat and resignation of Raymond Poincare, former president and several times premier of France, came on a comparative minor issue today after the premier had survived storms of criticism for his policy toward Germany and his fiscal program.

The government's pension bill was presented in the chamber by Count De LaSteyrie, who made it a question of confidence in the government.

By a narrow margin of seven votes, the deputies defeated the measure.

Poincare immediately met with his ministers and after some discussion of reform, the cabinet went to the Elysees and presented the resignation of the entire cabinet to the president.

President Millerand accepted the resignation.

POINCARE WANTS TO FORM NEW MINISTRY

Paris, March 26.—After resigning together with his entire cabinet today, Premier Poincare expressed a desire to form a new ministry.

Poincare so informed President Millerand, who had accepted the resignation with the greatest reluctance.

The premier said he would give a definite answer tomorrow, after consulting with his friends.

CAMPAIGN FOR GASOLINE TAX IN MINNESOTA

(By United Press)

St. Paul, March 26.—The state highway department today launched its campaign for a gasoline tax in Minnesota, similar to the gasoline tax in South Dakota.

Nickels and dimes collected from motorists in the purchase of gasoline would make up a fund of more than $4,000,000 annually which would provide Minnesota with highways better than in most northwest states, according to the department.

Thirty-six other states have the gasoline tax plan of supporting good roads.

The first barrage of the highway department calls the gasoline tax plan:

"Fair and equitable, popular and painless, and the only way to collect from tourists for highway use.

"It will make big cars pay more than small, will be collected with less expense than any other taxes, takes only nickels and dimes now and then, the distance traveled is the tax measure; no lump sum or year levy is to be paid down in advance and it will produce nearly $4,000,000 of road funds annually," the statement says.

Polk Declines Judgeship

(By United Press)

Warrenton, N. C., March 26.—Tasker Polk, kinsman of President Polk, has declined a Superior Court Judgeship tendered him by the governor of North Carolina. The descendant of the ante-bellum Polks is prominent in legal circles.

Multiplies Rapidly

The boll weevil dislikes cold weather. The spring brings the young cotton plants through the ground. He eats the blooms as they develop and deposits eggs inside the formation, says Nature Magazine. A pair of weevils invading a cotton field in May, and left undisturbed for four months, have a progeny of twelve million.

Hiram Johnson Leads in South Dakota Primaries

KING GEORGE IS DETERMINED TO STICK TO THRONE

(By United Press)

Bucharest, March 26.—King George, of Greece, announced today he will refuse to abdicate the Greek throne until a national plebiscite confirms the action of the assembly at Athens in dethronement of the dynasty and declaring a republic.

NATIONAL PLEBISCITE MAY DECIDE ISSUE

Athens, March 26.—The Greek constitutionalist committee issued a proclamation today against dethronement of the dynasty, alleging that a republic militaristic minority was responsible for the assembly's action.

It urges the Greek people to make any sacrifice to support their constitutional rights. Preparations are under way to hold a national plebiscite.

HOME TOWN BACKS CHRISTIANSON

DAWSON IS 100 PER CENT FOR HIM AS GOVERNOR

(By United Press)

Dawson, Minn., March 26.—Theodore Christianson, republican candidate for governor, has the whole home town back of him strong.

Six hundred citizens of Dawson at a mass meeting last night formed a "Christianson for Governor" club, and adopted resolutions heartily endorsing their candidate.

"We heartily endorse the candidacy of Theodore Christianson for governor, and commend him to the voters of the state," read the declaration.

His character both as a public and private citizen is above reproach; his service in the legislature particularly as chairman of the appropriations committee has given him a knowledge of state affairs that will insure a competent and businesslike administration of his office. His record of uncompromising opposition to the prevailing tendency toward increased public expenditures gives assurance that if the responsibility of the administration were placed in his hands, the government of Minnesota would be conducted without constant increase in taxation."

H. O. Halverson was made the president of the club.

ED LOCKHART, BANDIT, TRAIN ROBBER KILLED

BAD MAN SURPRISED WOULD-BE CAPTORS, DISARMING THEM

DEPUTY SHERIFF RECOVERED GUN AND KILLED THE DESPERADO

(By United Press)

Tulsa, Okla., March 26.—Ed Lockhart, notorious bandit and train robber, was shot and killed today by Deputy Sheriff Mont Grady of Muskogee.

Bob Sanford, sheriff of Tulsa county and six deputies had surrounded the Fred Walker farm about 15 miles from here after receiving word that Lockhart was in hiding on the place.

Lockhart surprised Grady and Deputy Jack Quast and disarmed them, placing Grady's revolver in his own pocket. He was forcing them up a timbered hill ahead of him when Grady by a sudden and daring move regained possession of his revolver and shot Lockhart.

Lockhart was the successor of Al Spencer and had scores of bank robberies, train holdups and murders and daring escapades in his record.

PREPARE TO INDICT HIM FOR CONTEMPT

HARRY F. SINCLAIR SINGLED OUT BY THE SENATE COMMITTEE

SINCLAIR MAY THEN BE PLACED IN SERGEANT-AT-ARMS' CUSTODY

Congress Today By United Press

Senate: Daugherty hearings to resume.

House: Judicial committee considers Chase impeachment.

Washington, March 26—Preparations were complete today for the indictment of Harry F. Sinclair for contempt.

District Attorney Peyton Gordon has received papers in the citation of the oil magnate who refused to answer questions put to him by the senate oil committee and promised to have them in the hands of the grand jury before tomorrow night.

As soon as the indictment is returned—and it is just a mere formality—Senator Walsh, chief senate prosecutor, plans to hale the defiant Sinclair before the bar of the senate and put him under custody of the sergeant-at-arms.

While the oil committee rested its hearings over until tomorrow, Walsh went ahead with a series of conferences with legal advisors planning his criminal cases.

There is little left for the investigating committee to do.

Witnesses for tomorrow include Al Jennings, reformed bad man of Oklahoma, who says he knew something of the deal rumored to have been proposed by Jake Hamon to have himself appointed secretary of the interior.

Jennings arrives in Washington today. R. L. Wilson, of Oklahoma City, who is said to know something of the same deal, also is to testify.

MRS. ROXIE STINSON TAKES FLING AT DAUGHERTY

Washington, March 26. — Mrs. Roxie Stinson charged Attorney General Daugherty with "moral responsibility" for the death of her divorced husband, Jesse Smith, in testimony before the senate committee investigating the department of justice today.

"I have no doubt in my mind but what Jesse Smith committed suicide," Mrs. Stinson declared, "but," she said, "I do feel that Harry Daugherty was morally responsible for his death."

POSTPONE IMPEACHMENT PROCEEDINGS OF CHASE

Washington, March 26—Consideration of the senate resolution asking impeachment of C. C. Chase, son-in-law of Albert B. Fall, was postponed today by the house judiciary committee.

The official copy of the resolution and attached testimony which was referred to the committee late yesterday, did not reach it in time for consideration at today's meeting.

Chairman Graham said the question would probably be taken up at tomorrow's regular session of the committee.

CLAIMS MILLIONS WERE CLEANED UP

Washington, March 26. — Five friends of Attorney General Daugherty and Jesse Smith "cleaned up $33,000,000 in the Sinclair oil deals, Mrs. Roxie Stinson told the senate Daugherty committee today that Jesse Smith told her.

Daugherty and Smith were not in the "deal," they were sore about it, Mrs. Stinson said Smith told her.

After openly accusing Daugherty of "moral responsibility" for Smith's death in Daugherty's apartment here last May, although she said she believed Smith was a suicide, Mrs. Stinson launched into a story of Smith's financial affairs, telling of the $33,000,000 deal.

She said she asked Smith one day if he had profited in a certain "deal." "Jesse said that five men the past few weeks had made $33,000,000," she testified. "I asked him if he and Harry were in on it. He said 'no,' that is what they were sore about as they were our friends too."

"What kind of a deal was it?" asked Senator Brookhart.

"A Sinclair oil deal," Mrs. Stinson replied.

After asking if she knew whether E. B. McLean, Washington publisher, was one of the five men and receiving a negative answer, the committee turned aside from the matter.

INVESTIGATE ALLEGED TEXAS LAND FRAUDS

Washington, March 26.—Smooth sailing henceforth in the investigation of alleged land frauds in Texas by the senate post office committee appeared probable today, as Chairman Moses and Senator Heflin reached an agreement on the introduction of the evidence.

The committee broke up in a row yesterday on this same question. As a result of the truce, Heflin announced today he would not take the matter to the senate for a little while yet as he decided he would do yesterday.

SINCLAIR CASE BEFORE GRAND JURY SOON

Washington, March 26.—The Sinclair contempt case will be placed before the federal grand jury here tomorrow, with a request for an indictment, U. S. District Attorney Peyton Gordon announced today.

Prompt action is expected from the jury by Gordon as the jury dissolves March 31st.

Al Jennings, former train robber, arrived here today to tell the senate oil committee what he knows about reported deals in the 1920 republican national convention. Jennings immediately conferred with Senator Walsh, Montana, who will question him tomorrow.

He declined to be interviewed by anyone, but said that his testimony would be "enlightening."

Asked about his train robbing exploits, Jennings replied:

"Yes, I was a bandit, but I never was secretary of the interior."

23 JAPANESE SAILORS BELIEVED DROWNED; FOG CAUSES WRECK

(By United Press)

Dungeness, England, March 26.—Twenty-three Japanese sailors are believed to have been drowned when the German steamer Heimdal struck and sank the Japanese cargo boat Tokofukumaru in a dense fog off the Kentish headland at midnight last night. Sixteen of the Japanese crew were saved.

WILL HUNT FOSSILS IN EAST AFRICA

(By United Press)

London, March 26.—Another expedition is going to hunt dinosaur. This one is from the Natural History Museum and will be headed by Dr. W. E. Cutler of Manitoba.

Cutler explained that the dinosaur relics were unearthed by the Germans in what was then German East Africa, at a spot in Tendagaru, Tanganyika Territory.

"The skeletons are of enormous size," he said. "These reptiles were about 22 feet high and from 6 to 80 feet long, and it has been stated that the African specimens were even larger. They flourished from eight to ten million years ago."

It is also expected to discover human fossils, from 500,000 to 1,000,000 years old.

Moon and Weather

Ancient almanacs to the contrary notwithstanding says Nature Magazine, the moon does not have any appreciable effect upon the weather.

WM. H. ANDERSON GETS A MOP AND SHOVEL IN PRISON

PRISON GARB OF GREY REPLACES "FIGHTING FROCK COAT"

FORMER ANTI-SALOON LEAGUE CHIEF NOW IN SING SING

(By United Press)

New York, March 26.—William H. Anderson, "No. 75,745," had a mop and a coal shovel today and began his work as a Sing Sing prisoner.

The prison garb of gray had replaced his "fighting frock coat," when the former chief of the State Anti-Saloon League pitched into his menial labors. It is possible if the convicted forger is a good prisoner that he may receive his release as a Christmas eve gift.

Meanwhile his appeal is pending before the appellate division of the supreme court, asking for a new trial from his conviction for altering the books of the Anti-Saloon League and his sentence of from one to two years.

Anderson entered the sombre walls of Sing Sing yesterday with shoulders erect. While his "pedigree" was taken in the clerk's office he was asked if he drank liquor. "I do not," he replied with a smile.

The "fighting reformer" was assigned to the reception room where there were forty others.

He may not receive any visitors for ten days.

SPEEDER ACCIDENT CLAIMS 2 VICTIMS

(By United Press)

Duluth, Minnesota, March 26. — Arthur Blackstrom, 21, who was injured at the same time his father was killed Monday morning at Dunn Junction, died Tuesday in a hospital at Grand Rapids as a result of internal injuries.

The two were riding a speeder when it was switched off a siding into a passing train. Father and son will be buried Thursday at Blackberry, their home.

Legion Asks Marble

(By United Press)

Washington, March 26. — Marble markers to replace wooden crosses over the graves of American dead overseas would be provided if requests made to the House Committee on Military Affairs are granted. The American Legion is sponsoring the movement to provide permanent markers to be substituted for the wooden crosses which are now erected over the graves. These crosses, the Legion avers, are rapidly deteriorating.

8 High Schools Entered In Declamatory Contest

(By United Press)

St. Cloud, March 26.—Eight high schools are represented here today in the west central district declamatory contests. The teams are paired as follows: Sauk Center-Alexandria, Milaca-Princeton; Little Falls-Staples and Elk River-St. Cloud.

No Machines on This

Of all American industries, that of making maple sugar is one of the most fascinating. Certainly none other has retained so great a measure of dependence upon the skill of the individual. It boasts many traditions, says Nature Magazine of Washington. In a machine age it has found machines inadequate. It has never been and never will be a large-scale industry. In the quality of its product and largely in the methods of its marketing it is a personal proposition.

BRITISH ROUND WORLD FLIERS LEAVE LYONS

(By United Press)

Le Havre, France, March 26.—The British round the world fliers took off from Lyons shortly after 11 a. m. today. The weather was cloudy and unfavorable.

The British fliers, headed by Commander MacLaren, left Calshot airdrome near Southampton, England, at 12:09 yesterday and crossed the English Channel, but were forced to descend at Octville, from where they continued to Le Havre.

BRITISH ARRIVE SAFELY AT LYONS

Lyons, France, March 26.—The British round the world fliers arrived here today, completing the first leg of their journey which was interrupted by a fog yesterday. They flew from Le Havre here to spend the night, arriving at 3:40 p. m.

LIEUT.-COL. BRIGGS MAKES DRAFT STUDY

CONFERRED WITH BOTH GOV. PREUS AND ADJT. GEN. W. F. RHINOW

St. Paul, March 26.—Lieut. Col. Briggs of the war department general staff was at the State Capitol yesterday, on a restudy of the workings of the selective service system.

He is making the study under the direction of Gen. John J. Pershing, who, in a letter introducing him to Gov. J. A. O. Preus, declares that the selective service system probably will be kept ready for use in case of another emergency, as it showed itself the most effective method of obtaining a large army in a short time.

Lieut. Col. Briggs conferred with both Gov. Preus and Adjt. Gen. W. F. Rhinow.

2 KILLED, 1 HURT ON A DULUTH R. R. CROSSING

(By United Press)

Duluth, Minn., March 26.—Two persons were instantly killed and one fatally injured today, when a Duluth and Iron Range train struck an automobile at a grade crossing at 45th avenue and Superior street.

The dead are: W. S. Kempton, 50, Duluth; John Kempton, 18, his son, and Edward Gyllenborg, 15, of Duluth.

The latter, a special delivery messenger, died on the way to a hospital. The party drove into the path of the train in trying to avoid a street car.

COMPLETE CHANGE IN THE HOUSE BONUS BILL

STATEMENT MADE BY SENATE FINANCE COMMITTEE TODAY

DIFFERENCE OF BILLION DOLLARS IN ESTIMATES

(By United Press)

Washington, March 26. — A complete change must be made in the house bonus bill, members of the senate finance committee agreed today.

A third estimate as to what the house bill would cost the government, varying a billion dollars from two other experts' estimates, was presented to the committee by Albert Heiss, American Legion representative, causing committee members to declare that the house bill cannot be submitted to the senate in its present form.

EACH CLAIMS A MAJORITY OF 10,000

FINAL FIGURES EXPECTED TO BE CLOSE, ONLY FEW HUNDRED DIFFERENCE

VOTE IN 491 PRECINCTS GAVE COOLIDGE 21,323, JOHNSON 18,136

(By United Press)

Sioux Falls, S. D., March 26.—Hiram Johnson will have South Dakota's 10 delegates to the republican national convention.

With returns virtually complete from every city and thickly populated communities, this afternoon, the California senator went into the lead of President Coolidge.

Remaining precincts to be reported from will add to Johnson's strength, it appeared.

Although Coolidge headquarters was expected to concede defeat, a noon estimate predicted the president will have a plurality of four to five thousand over Johnson. Johnson headquarters maintained Johnson will win the plurality by 3,000 or more.

The democratic delegation to New York will carry instructions to stand by William G. McAdoo.

U. S. G. Cherry of Sioux Falls received the democratic nomination for U. S. senator by a three to one vote over Mark T. Bates.

Senator La Follette had no chance in the republican primary and in the farmer-labor balloting had no opposition.

Under the Richards primary law a voter must ballot in the party for which he registers and virtually all the La Follette support was registered in the farmer-labor party or not registered at all.

Thousands of democrats and farmer-laborites failed to vote for lack of contest.

Sioux Falls, S. D., March 26.—Both Calvin Coolidge and Hiram Johnson claimed the republican presidential preference of South Dakota early today.

Headquarters of each issued statements, both claiming a majority of 10,000.

The final figures will be close—perhaps with a few hundred votes difference between the two.

President Coolidge had a lead of about 3,000 early today, which was being cut down by Johnson as country precincts came in.

The vote in 491 precincts out of 1,740 in the state gave Coolidge 21,323 and Johnson 18,136. Governor W. H. McMasters is assured the nomination of United States senator on the republican ticket, having a lead of 2,500 over Senator Sterling early today, with the country vote constantly increasing his majority.

Rain and bad roads—in some places impassable—held down the rural vote in the western half of the state.

Governor W. M. McMaster most likely will join his friend, Senator Peter Norbeck in Washington, by virtue of winning the republican nomination.

The gasoline governor will carry on his fight on Standard Oil and the International Harvester company in which he gained some success and won the farmer vote. With about one-fourth of the precincts heard from, Governor McMaster apparently defeated Senator Thomas Sterling by a majority of about 10,000 votes—or just about the strength of the soldier vote in the state.

With 490 precincts counted, McMaster had 21,089 and Sterling 16,809, with the remainder of the votes expected to add to McMaster's plurality.

Representative Royal C. Johnson decisively defeated H. G. Fuller, of Pierre, in the second congressional district and will have but little op-

PREPARE TO INDICT HIM FOR CONTEMPT

HARRY F. SINCLAIR SINGLED OUT BY THE SENATE COMMITTEE

SINCLAIR MAY THEN BE PLACED IN SERGEANT-AT-ARMS' CUSTODY

Congress Today By United Press

Senate: Daugherty hearings to resume.

House: Judicial committee considers Chase impeachment.

Washington, March 26—Preparations were complete today for the indictment of Harry F. Sinclair for contempt.

District Attorney Peyton Gordon has received papers in the citation of the oil magnate who refused to answer questions put to him by the senate oil committee and promised to have them in the hands of the grand jury before tomorrow night.

As soon as the indictment is returned—and it is just a mere formality—Senator Walsh, chief senate prosecutor, plans to hale the defiant Sinclair before the bar of the senate and put him under custody of the sergeant-at-arms.

While the oil committee rested its hearings over until tomorrow, Walsh went ahead with a series of conferences with legal advisors planning his criminal cases.

There is little left for the investigating committee to do.

Witnesses for tomorrow include Al Jennings, reformed bad man of Oklahoma, who says he knew something of the deal rumored to have been proposed by Jake Hamon to have himself appointed secretary of the interior.

Jennings arrives in Washington today. R. L. Wilson, of Oklahoma City, who is said to know something of the same deal, also is to testify.

MRS. ROXIE STINSON TAKES FLING AT DAUGHERTY

Washington, March 26. — Mrs. Roxie Stinson charged Attorney General Daugherty with "moral responsibility" for the death of her divorced husband, Jesse Smith, in testimony before the senate committee investigating the department of justice today.

"I have no doubt in my mind but what Jesse Smith committed suicide," Mrs. Stinson declared, "but," she said, "I do feel that Harry Daugherty was morally responsible for his death."

POSTPONE IMPEACHMENT PROCEEDINGS OF CHASE

Washington, March 26—Consideration of the senate resolution asking impeachment of C. C. Chase, son-in-law of Albert B. Fall, was postponed today by the house judiciary committee.

The official copy of the resolution and attached testimony which was referred to the committee late yesterday, did not reach it in time for consideration at today's meeting.

Chairman Graham said the question would probably be taken up at tomorrow's regular session of the committee.

CLAIMS MILLIONS WERE CLEANED UP

Washington, March 26. — Five friends of Attorney General Daugherty and Jesse Smith "cleaned up $33,000,000 in the Sinclair oil deals, Mrs. Roxie Stinson told the senate Daugherty committee today that Jesse Smith told her.

Daugherty and Smith were not in the "deal," they were sore about it, Mrs. Stinson said Smith told her.

After openly accusing Daugherty of "moral responsibility" for Smith's death in Daugherty's apartment here last May, although she said she believed Smith was a suicide, Mrs. Stinson launched into a story of Smith's financial affairs, telling of the $33,000,000 deal.

She said she asked Smith one day if he had profited in a certain "deal." "Jesse said that five men the past few weeks had made $33,000,000," she testified. "I asked him if he and Harry were in on it. He said 'no,' that is what they were sore about as they were our friends too."

"What kind of a deal was it?" asked Senator Brookhart.

"A Sinclair oil deal," Mrs. Stinson replied.

After asking if she knew whether E. B. McLean, Washington publisher, was one of the five men and receiving a negative answer, the committee turned aside from the matter.

INVESTIGATE ALLEGED TEXAS LAND FRAUDS

Washington, March 26.—Smooth sailing henceforth in the investigation of alleged land frauds in Texas by the senate post office committee appeared probable today, as Chairman Moses and Senator Heflin reached an agreement on the introduction of the evidence.

The committee broke up in a row yesterday on this same question. As a result of the truce, Heflin announced today he would not take the matter to the senate for a little while yet as he decided he would do yesterday.

SINCLAIR CASE BEFORE GRAND JURY SOON

Washington, March 26.—The Sinclair contempt case will be placed before the federal grand jury here tomorrow, with a request for an indictment, U. S. District Attorney Peyton Gordon announced today.

Prompt action is expected from the jury by Gordon as the jury dissolves March 31st.

Al Jennings, former train robber, arrived here today to tell the senate oil committee what he knows about reported deals in the 1920 republican national convention. Jennings immediately conferred with Senator Walsh, Montana, who will question him tomorrow.

He declined to be interviewed by anyone, but said that his testimony would be "enlightening."

Asked about his train robbing exploits, Jennings replied:

"Yes, I was a bandit, but I never was secretary of the interior."

23 JAPANESE SAILORS BELIEVED DROWNED; FOG CAUSES WRECK

(By United Press)

Dungeness, England, March 26.—Twenty-three Japanese sailors are believed to have been drowned when the German steamer Heimdal struck and sank the Japanese cargo boat Tokofukumaru in a dense fog off the Kentish headland at midnight last night. Sixteen of the Japanese crew were saved.

WILL HUNT FOSSILS IN EAST AFRICA

(By United Press)

London, March 26.—Another expedition is going to hunt dinosaur. This one is from the Natural History Museum and will be headed by Dr. W. E. Cutler of Manitoba.

Cutler explained that the dinosaur relics were unearthed by the Germans in what was then German East Africa, at a spot in Tendagaru, Tanganyika Territory.

"The skeletons are of enormous size," he said. "These reptiles were about 22 feet high and from 6 to 80 feet long, and it has been stated that the African specimens were even larger. They flourished from eight to ten million years ago."

It is also expected to discover human fossils, from 500,000 to 1,000,000 years old.

Moon and Weather

Ancient almanacs to the contrary notwithstanding says Nature Magazine, the moon does not have any appreciable effect upon the weather.

WM. H. ANDERSON GETS A MOP AND SHOVEL IN PRISON

PRISON GARB OF GREY REPLACES "FIGHTING FROCK COAT"

FORMER ANTI-SALOON LEAGUE CHIEF NOW IN SING SING

(By United Press)

No Machines on This

Of all American industries, that of making maple sugar is one of the most fascinating. Certainly none other has retained so great a measure of dependence upon the skill of the individual. It boasts many traditions, says Nature Magazine of Washington. In a machine age it has found machines inadequate. It has never been and never will be a large-scale industry. In the quality of its product and largely in the methods of its marketing it is a personal proposition.

BRITISH ROUND WORLD FLIERS LEAVE LYONS

(By United Press)

Le Havre, France, March 26.—The British round the world fliers took off from Lyons shortly after 11 a. m. today. The weather was cloudy and unfavorable.

The British fliers, headed by Commander MacLaren, left Calshot airdrome near Southampton, England, at 12:09 yesterday and crossed the English Channel, but were forced to descend at Octville, from where they continued to Le Havre.

BRITISH ARRIVE SAFELY AT LYONS

Lyons, France, March 26.—The British round the world fliers arrived here today, completing the first leg of their journey which was interrupted by a fog yesterday. They flew from Le Havre here to spend the night, arriving at 3:40 p. m.

LIEUT.-COL. BRIGGS MAKES DRAFT STUDY

CONFERRED WITH BOTH GOV. PREUS AND ADJT. GEN. W. F. RHINOW

St. Paul, March 26.—Lieut. Col. Briggs of the war department general staff was at the State Capitol yesterday, on a restudy of the workings of the selective service system.

He is making the study under the direction of Gen. John J. Pershing, who, in a letter introducing him to Gov. J. A. O. Preus, declares that the selective service system probably will be kept ready for use in case of another emergency, as it showed itself the most effective method of obtaining a large army in a short time.

Lieut. Col. Briggs conferred with both Gov. Preus and Adjt. Gen. W. F. Rhinow.

2 KILLED, 1 HURT ON A DULUTH R. R. CROSSING

(By United Press)

Duluth, Minn., March 26.—Two persons were instantly killed and one fatally injured today, when a Duluth and Iron Range train struck an automobile at a grade crossing at 45th avenue and Superior street.

The dead are: W. S. Kempton, 50, Duluth; John Kempton, 18, his son, and Edward Gyllenborg, 15, of Duluth.

The latter, a special delivery messenger, died on the way to a hospital. The party drove into the path of the train in trying to avoid a street car.

COMPLETE CHANGE IN THE HOUSE BONUS BILL

STATEMENT MADE BY SENATE FINANCE COMMITTEE TODAY

DIFFERENCE OF BILLION DOLLARS IN ESTIMATES

(By United Press)

Washington, March 26. — A complete change must be made in the house bonus bill, members of the senate finance committee agreed today.

A third estimate as to what the house bill would cost the government, varying a billion dollars from two other experts' estimates, was presented to the committee by Albert Heiss, American Legion representative, causing committee members to declare that the house bill cannot be submitted to the senate in its present form.

EACH CLAIMS A MAJORITY OF 10,000

FINAL FIGURES EXPECTED TO BE CLOSE, ONLY FEW HUNDRED DIFFERENCE

VOTE IN 491 PRECINCTS GAVE COOLIDGE 21,323, JOHNSON 18,136

(By United Press)

Sioux Falls, S. D., March 26.—Hiram Johnson will have South Dakota's 10 delegates to the republican national convention.

With returns virtually complete from every city and thickly populated communities, this afternoon, the California senator went into the lead of President Coolidge.

Remaining precincts to be reported from will add to Johnson's strength, it appeared.

Although Coolidge headquarters was expected to concede defeat, a noon estimate predicted the president will have a plurality of four to five thousand over Johnson. Johnson headquarters maintained Johnson will win the plurality by 3,000 or more.

The democratic delegation to New York will carry instructions to stand by William G. McAdoo.

U. S. G. Cherry of Sioux Falls received the democratic nomination for U. S. senator by a three to one vote over Mark T. Bates.

Senator La Follette had no chance in the republican primary and in the farmer-labor balloting had no opposition.

Under the Richards primary law a voter must ballot in the party for which he registers and virtually all the La Follette support was registered in the farmer-labor party or not registered at all.

Thousands of democrats and farmer-laborites failed to vote for lack of contest.

Sioux Falls, S. D., March 26.—Both Calvin Coolidge and Hiram Johnson claimed the republican presidential preference of South Dakota early today.

Headquarters of each issued statements, both claiming a majority of 10,000.

The final figures will be close—perhaps with a few hundred votes difference between the two.

President Coolidge had a lead of about 3,000 early today, which was being cut down by Johnson as country precincts came in.

The vote in 491 precincts out of 1,740 in the state gave Coolidge 21,323 and Johnson 18,136. Governor W. H. McMasters is assured the nomination of United States senator on the republican ticket, having a lead of 2,500 over Senator Sterling early today, with the country vote constantly increasing his majority.

Rain and bad roads—in some places impassable—held down the rural vote in the western half of the state.

Governor W. M. McMaster most likely will join his friend, Senator Peter Norbeck in Washington, by virtue of winning the republican nomination.

The gasoline governor will carry on his fight on Standard Oil and the International Harvester company in which he gained some success and won the farmer vote. With about one-fourth of the precincts heard from, Governor McMaster apparently defeated Senator Thomas Sterling by a majority of about 10,000 votes—or just about the strength of the soldier vote in the state.

With 490 precincts counted, McMaster had 21,089 and Sterling 16,809, with the remainder of the votes expected to add to McMaster's plurality.

Representative Royal C. Johnson decisively defeated H. G. Fuller, of Pierre, in the second congressional district and will have but little op-

EARLY YARNS ON COAL

Tavern Keeper and Blacksmith Get Credit for Discovery of Anthracite

There are several stories of the first attempts to make anthracite coal behave as it was then thought all coal should behave. It came to be known as "stone coal," says Nature Magazine of Washington, and for a number of years was commercially unpopular.

It is related, as one of the stories of the discovery of the secret of hard coal, that the owner of Fell's Tavern, in Wilkes Barre, Pennsylvania, had some anthracite nuggets lying about. He threw some of them on a wood fire in an open grate one night and retired.

Imagine his surprise the next morning, after he had been repeatedly told by guests at his tavern that the stuff was no good, to find an extraordinarily heat-giving fire burning in the grate.

Another version has it that a blacksmith near Scranton had a pile of the 'stone coal" in his yard. He was a stubborn chap and told himself one day that he would make the stuff burn. He put it in his forge, poked it, blew air through it and otherwise treated it like any well-behaved soft coal. He stuck to it without success and finally went home in disgust.

The next morning he found it burning merrily in his forge, a decidedly satisfactory fire.

The circulation of stories against anthracite coal retarded its use for a time.

Moon Reflects Sunlight

The moon emits no light of its own, says Nature Magazine. Moonlight is simply reflected sunlight.

Banana Is Odd Plant

To most of us the banana is the golden yellow fruit seen in great bunches in the fruit stalls. To the botanist it is the product of what is perhaps the most widely known plant without a stem of wood—an interesting member of a useful and widespread family, says Nature Magazine of Washington. To the expert in food economics it is a fruit of profuse growth excelling even wheat in food production to the acre. The history of the banana as an article of daily diet goes back into remote centuries in the civilization of the eastern hemisphere.

Water for Oranges

Irrigation is an important feature of the orange growers' industry, says Nature Magazine. It is particularly necessary in Arizona and California, while the Florida groves can generally depend upon the rainfall.

Grand Idea

The delusion that anybody can write a movie is causing some five million boobs to "take a course" and they are writing scenarios. Suppose some stonedeaf farmhand in Missouri read this advertisement:

"WRITE GRAND OPERA and make a million dollars. Being deaf, dumb and blind is no bar. The Stone Deaf Dutchman, Wagner, wrote operas with his feet and made 18 million dollars. You can do the same. Send $24 for full course, including tin whistle on which you can learn the scale, and ruled paper on which you can then write the music. Everybody is as full of grand operas as a hide-bound horse is full of rheumatism. We teach in four simple lessons how to write your grand operas and get rich."—The Norfolk Virginian-Pilot.

COUNTY AGENT GIVES POINTERS

Information Valuable to Poultry Men on Egg Hatching Problems

DO NOT CHILL THE EGGS

Dry Summers Makes It Necessary to Supplant Permanent Pastures

County Agent E. G. Roth has given the Dispatch this information of value to poultry men and others:

Hatching Eggs Uniform Shape and Size

Each hatching egg should conform as nearly as possible in shape and shade of color. White eggs should be pure white and free from yellow tints. Brown eggs may be of light, medium, or dark brown, but each egg should be of the same shade of brown if possible.

Condition

Eggs for hatching should be perfectly clean, and free from marks or stains. They should be gathered often and nesting material kept clean and sanitary.

Quality

Hatching eggs should be set as fresh as possible, and not older than 10 days for best results. They should not become chilled, but kept at a temperature between 50 and 60 degrees in a dry place. They should be stored in a market egg case with all fillers in place, and the case turned on a different side daily after the first few days until the eggs are placed in the incubator or under hens. Purchased eggs that have been shipped some distance should rest at least 24 hours before being incubated.

Fertility

Hatching eggs may be tested for fertility by keeping a few eggs from the breeding pen in a warm place for 36 hours. If fertile, when opened the germ on the surface of the yolk will be enlarged. If the eggs are infertile, the germ disk will remain about the size of the head of a pin. The broken eggs are edible if the blood is not discerned.

Hatchability

The hatchability of eggs depends on the condition of the breeding stock and their feed and care. The care of the eggs until used for incubation also affects their hatchability.

Soiling Crops Needed to Keep up Milk Flow

Because of a succession of dry summers in northeastern Minnesota it has become necessary to supplement permanent pastures, if dairy cows are to be properly fed and the milk flow maintained in August just as butterfat prices start on the ascending scale.

To do this grow:

1. Sweet clover pasture. Not yet generally established; sow seed this spring for 1925.

2. Summer silage. Not wholly practical since most farms with silos have winter capacity only and if there is a carry-over much of it spoils.

3. Soiling crops, that is, crops cut green, hauled in and fed. The last offers the cheapest and best solution of the problem. Such crops require only a limited acreage. Fall sown rye is the first available in the summer. Oats, though somewhat later, offers the greatest range of seeding, late April to late June, and thus serves more need. Peas may be sown with it. Second crop sweet clover, and later sunflowers (chopped) and corn all make excellent feed.

ON FOREST FIRE PROTECTION WEEK

E. H. Rhodes, Local Forest Ranger, Makes Announcement of Its Purpose

TAKES WEEK OF APRIL 21 TO 27

To Bring Home to American People, Great Lessons Taught by Forest Fires

E. H. Rhodes, local forest ranger, makes the following announcement concerning the observance of forest fire protection week and arbor day:

The week of April 21st to 27th has been designated by President Coolidge as "Forest Protection Week" and April 25th as Arbor Day.

Forest Protection Week this spring will mark the fourth annual observance of an intensive campaign to acquaint the public with the serious and unnecessary damage caused by forest fires. More than 36,000 fires are reported in the United States every year, and an area of about 11,000,000 acres are swept by the flames, causing loss of life as well as a great loss of our natural resources.

Forest Protection Week offers an opportunity for all organizations, such as business men's clubs, sportsmens organizations, Boy Scouts, Girl Scouts, as well as school superintendents, county agents and teachers to bring home to the American people the great lesson that forest fires must be stamped out.

To all schools that are interested in planting trees and who will put on a special program for Forest Protection Week, especially on Arbor Day, the State Forestry Department will furnish up to a dozen or more ash trees, four or five feet in height, for the beautifying of the school grounds.

Mr. Rhodes is in a position to furnish special Arbor Day programs, but states that requests for trees must be in his office not later than April 10th. Further information can be had by communicating with him at his office in the city hall.

Orange From Asia

The sweet orange is a native of eastern Asia and was carried to India, Asia Minor, and the south of Europe along the Mediterranean, says Nature Magazine. The early navigators of Portugal are supposed to have brought it home from India.

A "Sub" for Coal

Coke is made by the distillation of bituminous coal into gas, says Nature Magazine. This leaves a porous and bulky fuel that burns well when ignited.

FARMER-LABOR MEETING HELD

First of Series in Brainerd Draws Interested Men and Women Tuesday Evening

WILFRED CANAN PRESIDED

O. J. Bouma Spoke on the Necessity of Proper Organization in District

The first meeting of a series to be held in the Labor hall by the Farmer-Labor clubs of the county, drew an interested audience of both men and women on Tuesday evening.

The purpose of this meeting as explained by Wilfred Canan, who presided, was to outline the progressive and democratic plan of organization employed in organizing Farmer-Labor clubs in each precinct and township in every county.

O. J. Bouma, supervisor of organization, addressed the audience, confining his remarks to the necessity of organization, the manner and results of organization.

Practically everyone present approved of the plan, but for reasons over which they seemed to have no control, none were willing to publicly ally themselves with the Farmer-Labor movement, though many promised to call at the district office for enrollment in the near future.

The audience was entertained by a few cartoons drawn by Mr. Canan on current event subjects in which the Farmer-Labor movement is interested.

A similar meeting is scheduled for this evening, with the same speakers to which the public is invited.

READING CIRCLES

Formed Under Auspices of Department of Minnesota Federation of Women's Clubs

Mrs. Willard Bayliss, of Chisholm, Minn., chairman of the Department of Public Welfare for the Minnesota Federation of Women's clubs, has issued a long list of splendid books, in which the child welfare committee of the Brainerd Musical club is making an effort to interest its members.

Reading circles of eight or 10 ladies are being formed, each member paying 25 cents toward the purchase of a book. Six months will be given to the reading of each book, after which it will be placed in the public library.

Reading Circle No. 1 has decided upon the book that it will read. The members of this circle are Mrs. Henry I. Cohen, Mrs. F. A. Farrar, Mrs. A. D. Polk, Mrs. E. J. Quinn, Mrs. W. C. Cobb, Mrs. Irma Camp Hartley, Mrs. J. M. Elder and Mrs. G. W. Mosier.

L.S.

Jesse L. Lasky presents

"CHILDREN OF JAZZ"

To Mr. and Mrs. Public:

More than 46,000 of you, to whom this is addressed, own the business of Swift & Company.

The officers and directors of Swift & Company, are responsible to these owners.

When Gustavus F. Swift first started in business in New England in 1868, he was alone. When he incorporated the business in 1885 as Swift & Company, six persons comprised the list of shareholders.

Today, in 1924, there are consumers, retailers, producers of live stock, employes of Swift & Company, in fact, thousands of Mr. and Mrs. Publics in the list of shareholders.

No one man or family owns as much as 50 per cent of the stock of the Company; in fact, it would take about 900 of the largest shareholders to vote 51 per cent of the shares.

We are proud of the fact that about one-third of the list is made up of employes — and that these employes own over $20,000,000 worth of our stock.

Swift & Company's 1924 Year Book tells more about this on page 22, and also about many other interesting phases of the packing business.

You may have a copy free for the asking.

WEDNESDAY, MARCH 26, 1924

DRUNKEN AUTO DRIVERS

FROM Duluth, Minneapolis and other cities come reports of early spring, reckless driving of drunken motorists, leaving a trail of injured and dead in their paths. At Little Falls early Sunday morning a driver struck a man and never halted.

"Lock them up," says the St. Paul Daily News in a forceful editorial. Judges now have an opportunity to show all automobile drivers that they mean business in the enforcement of traffic laws.

Within the last 24 hours five people have been injured in four St. Paul accidents said to have been caused by drunken men driving cars. Every decent person in the city, whether an automobile driver or not, will agree that the business of permitting drunken men to drive cars must stop.

Plenty of warning has been given. The only way to act now is to put those in the workhouse who refuse to heed warnings and show an appreciation of the patience thus far extended their kind. They won't be driving cars if locked up in the workhouse.

HE'S A PIANIST

SOME time ago there was a report current that Stanislaus Zbyszko, Polish wrestler, was to abandon the mat game and become a singer. This is wrong. It has been reported that he is not to sing but to play piano. He is a pianist of exceptional ability, having graduated from the University of Vienna. As it is, Zbyszko has the advantage of many a contemporary pianist when it comes to reach, staying qualities, etc. A double octave may be easy for him.

However, if Zbyszko is angry (we are mentioning his name several times so as to train our refractory typewriter in spelling it correctly), and wants to abandon wrestling why take it out of the music world? There is no more harmony in the music world than in the wrestling game. Somebody is always going flat or hitting a minor key.

MEXICAN PYRAMIDS

DUE to the exploratory work of Howard Carter, the Egyptian pyramids, Valley of the Kings and everything Egyptian gained much publicity. But the western world has its pyramids, too.

Prehistoric culture in Mexico will be studied next summer by a group of students led by Dr. Byron Cummings, head of the department of archaeology, University of Arizona, who will visit the City of Mexico to examine the pyramid of Cuicuilo, which is said to be more than 10,000 years old. This pyramid was uncovered through the efforts of Doctor Cummings, with the assistance of the Mexican government.

OUR HIGHWAY CONSTRUCTION

OUR highway construction methods and results attained have achieved such success that it is interesting neighboring countries. An intensive field study of American highways and highway transport will be made during the coming summer by representatives of 20 Latin-American countries.

The party will be the guests of the Highway Education Board, of which John J. Tigert, United States Commissioner of Education, is chairman. It is proposed to conduct the visitors on a tour of about three weeks through several of the states which have been most active in highway construction.

MEETS WITH REBUFF

ST. CLOUD'S attempt to tax outside buses by licensing them has met with a rebuff. The Jefferson Highway Transportation company carried it into the courts and Judge Cant, in filing his memorandum, granting a temporary injunction, restraining the city, said: "There is no sufficient justification in reason for providing that buses which run into and through a city in part to a terminus may be subject to the imposition of a license fee, while buses of the same kind which traverse the city from boundary to boundary and beyond shall not be subject thereto."

MORE DEVILS REPORTED

CENTRAL Minnesota, at one time, was a prolific center of rumors that a devil had been seen at a country dance, had cracked the offending fiddle, put out the lights and broken up the dance, although some logical minds reasoned what could cause a devil to entertain such reformed ideas. Now, says the Minneapolis Journal, editorially, a devil has been seen in New Jersey. He has cloven hoofs and wings like an albatross, and is seven feet high.

POULTRY PAYS

THAT poultry raising and the egg yield is a paying investment is evidenced by the report made that the farmers of Blue Earth county were paid about $2,000,000 last year for their poultry and eggs. The estimate is considered a reliable one, being made by the commission house men who handled most of this product.

BEMIDJI has continued its drive against the illicit sale of liquor. Monday morning stiff fines and caustic admonishments, says the Bemidji Daily Pioneer, featured a session of the municipal court when 14 persons were arraigned on charges of selling liquor and convictions were secured in all except one. Undercover men secured the evidence. The list included men selling liquor at certain hotels, a certain jitney driver, and employes of certain soft drink places.

DULUTH and St. Cloud city councils have recently refused to grant licenses to traveling carnival companies. They claimed their performances did not benefit a community.

THE St. Cloud Daily Times says the democrats have a chance to win in Minnesota and the St. Cloud Daily Journal-Press counters by saying it's the wildest dream of the century.

SOAPING street car tracks near a railway crossing brought about the arrest of St. Cloud youths.

HIRAM JOHNSON LEADS IN SOUTH DAKOTA PRIMARIES

(Continued from page 1)

position from either the farmer-labor or democratic opponents this fall.

William G. McAdoo will have the state's democratic delegation, defeating the move for an uninstructed delegation to the national convention, by a ten to one vote.

Robert M. LaFollette, although he stands endorsed by the farmer-labor party, did not figure as much in the republican primaries as was anticipated. It was thought many would write his name in.

Johnson Cuts Coolidge Lead

Senator Johnson had cut the Coolidge lead below 2,000 votes in tabulation before noon.

In 540 precincts up, the vote stood:

Coolidge 23,249, Johnson 21,351.

Johnson's gains made his nomination virtually certain.

In 556 precincts, the senatorship race stood:

McMaster 23,235, Sterling 19,742.

Coolidge Carried 20 Counties

Of the 44 counties more than half complete, President Coolidge carried twenty by a narrow margin except in Sioux Falls and Black Hills, and Senator Johnson carried 24.

All the counties going to Senator Johnson gave him enormous leads, half of them going to the Californian two to one and Dueul county going three to one for Johnson.

The vote ran about seventy per cent of normal in most of the city districts.

In Mitchell and Black Hills, however, a record primary vote was cast.

The country vote was only about fifty per cent of normal and small towns ran about sixty per cent of normal.

Wind Spreads Cotton Seed

The wind plays an important part in spreading the numerous down-covered seeds when the cotton plant is not systematicaly cultivated, says Nature Magazine. The root penetrates deep into the soil. The plant responds readily to differences in climate, soil, and methods of growing.

RED PEPPER HEAT BREAKS BAD CHEST COLDS OVER NIGHT

Ease your tight, aching chest. Stop the pain. Break up the congestion. Feel a bad cold loosen up in just a short time.

"Red Pepper Rub" is the cold remedy that brings quickest relief. It cannot hurt you and it certainly seems to end the tightness and drive the congestion and soreness right out.

Nothing has such concentrated, penetrating heat as red peppers, and when heat penetrates right down into colds, congestion, aching muscles and sore, stiff joints, relief comes at once.

The moment you apply Red Pepper Rub you feel the tingling heat. In three minutes the congested spot is warmed through and through. When you are suffering from a cold, rheumatism, backache, stiff neck or sore muscles, just get a jar of Rowles' Red Pepper Rub, made from red peppers, at any drug store. You will have the quickest relief known. Always say "Rowles." —Advt.

A One-Year Plant

Cotton is a seed plant. We find it growing either as a shrub or a tree with heights varying from 3 to 20 feet, says Nature Magazine. For the most part the plant lives one year, although it is found having a two-year span of life and in some cases a continuous life.

A TALK WITH A BRAINERD MAN

Mr. J. L. Rush, Carpenter, of 726 4th Ave., Tells of His Experience

There is nothing like a talk with one of our own citizens for giving hope and encouragement to the anxious sufferer from the dread kidney disease. We, therefore, give here an interview with a Brainerd man:

"My kidneys were giving me some trouble and the pain and misery I was in was intense," says Mr. Rush. "When I laid down I was bothered quite a bit and could get little rest. My kidneys bothered me at night and mornings I was stiff and sore across the small of my back. I had a steady, dull ache across my kidneys day and night. My kidneys acted frequently and the secretions were highly colored. I started using Doan's Pills and they relieved me so I could get back to work again, feeling as well as ever."

WEDNESDAY, MARCH 26, 1924

DRUNKEN AUTO DRIVERS

FROM Duluth, Minneapolis and other cities come reports of early spring, reckless driving of drunken motorists, leaving a trail of injured and dead in their paths. At Little Falls early Sunday morning a driver struck a man and never halted.

"Lock them up," says the St. Paul Daily News in a forceful editorial. Judges now have an opportunity to show all automobile drivers that they mean business in the enforcement of traffic laws.

Within the last 24 hours five people have been injured in four St. Paul accidents said to have been caused by drunken men driving cars. Every decent person in the city, whether an automobile driver or not, will agree that the business of permitting drunken men to drive cars must stop.

Plenty of warning has been given. The only way to act now is to put those in the workhouse who refuse to heed warnings and show an appreciation of the patience thus far extended their kind. They won't be driving cars if locked up in the workhouse.

HE'S A PIANIST

SOME time ago there was a report current that Stanislaus Zbyszko, Polish wrestler, was to abandon the mat game and become a singer. This is wrong. It has been reported that he is not to sing but to play piano. He is a pianist of exceptional ability, having graduated from the University of Vienna. As it is, Zbyszko has the advantage of many a contemporary pianist when it comes to reach, staying qualities, etc. A double octave may be easy for him.

However, if Zbyszko is angry (we are mentioning his name several times so as to train our refractory typewriter in spelling it correctly), and wants to abandon wrestling why take it out of the music world? There is no more harmony in the music world than in the wrestling game. Somebody is always going flat or hitting a minor key.

MEXICAN PYRAMIDS

DUE to the exploratory work of Howard Carter, the Egyptian pyramids, Valley of the Kings and everything Egyptian gained much publicity. But the western world has its pyramids, too.

Prehistoric culture in Mexico will be studied next summer by a group of students led by Dr. Byron Cummings, head of the department of archaeology, University of Arizona, who will visit the City of Mexico to examine the pyramid of Cuicuilo, which is said to be more than 10,000 years old. This pyramid was uncovered through the efforts of Doctor Cummings, with the assistance of the Mexican government.

OUR HIGHWAY CONSTRUCTION

OUR highway construction methods and results attained have achieved such success that it is interesting neighboring countries. An intensive field study of American highways and highway transport will be made during the coming summer by representatives of 20 Latin-American countries.

The party will be the guests of the Highway Education Board, of which John J. Tigert, United States Commissioner of Education, is chairman. It is proposed to conduct the visitors on a tour of about three weeks through several of the states which have been most active in highway construction.

MEETS WITH REBUFF

ST. CLOUD'S attempt to tax outside buses by licensing them has met with a rebuff. The Jefferson Highway Transportation company carried it into the courts and Judge Cant, in filing his memorandum, granting a temporary injunction, restraining the city, said: "There is no sufficient justification in reason for providing that buses which run into and through a city in part to a terminus may be subject to the imposition of a license fee, while buses of the same kind which traverse the city from boundary to boundary and beyond shall not be subject thereto."

MORE DEVILS REPORTED

CENTRAL Minnesota, at one time, was a prolific center of rumors that a devil had been seen at a country dance, had cracked the offending fiddle, put out the lights and broken up the dance, although some logical minds reasoned what could cause a devil to entertain such reformed ideas. Now, says the Minneapolis Journal, editorially, a devil has been seen in New Jersey. He has cloven hoofs and wings like an albatross, and is seven feet high.

POULTRY PAYS

THAT poultry raising and the egg yield is a paying investment is evidenced by the report made that the farmers of Blue Earth county were paid about $2,000,000 last year for their poultry and eggs. The estimate is considered a reliable one, being made by the commission house men who handled most of this product.

BEMIDJI has continued its drive against the illicit sale of liquor. Monday morning stiff fines and caustic admonishments, says the Bemidji Daily Pioneer, featured a session of the municipal court when 14 persons were arraigned on charges of selling liquor and convictions were secured in all except one. Undercover men secured the evidence. The list included men selling liquor at certain hotels, a certain jitney driver, and employes of certain soft drink places.

DULUTH and St. Cloud city councils have recently refused to grant licenses to traveling carnival companies. They claimed their performances did not benefit a community.

THE St. Cloud Daily Times says the democrats have a chance to win in Minnesota and the St. Cloud Daily Journal-Press counters by saying it's the wildest dream of the century.

SOAPING street car tracks near a railway crossing brought about the arrest of St. Cloud youths.

HIRAM JOHNSON LEADS IN SOUTH DAKOTA PRIMARIES

(Continued from page 1)

position from either the farmer-labor or democratic opponents this fall.

William G. McAdoo will have the state's democratic delegation, defeating the move for an uninstructed delegation to the national convention, by a ten to one vote.

Robert M. LaFollette, although he stands endorsed by the farmer-labor party, did not figure as much in the republican primaries as was anticipated. It was thought many would write his name in.

Johnson Cuts Coolidge Lead

Senator Johnson had cut the Coolidge lead below 2,000 votes in tabulation before noon.

In 540 precincts up, the vote stood:

Coolidge 23,249, Johnson 21,351.

Johnson's gains made his nomination virtually certain.

In 556 precincts, the senatorship race stood:

McMaster 23,235, Sterling 19,742.

Coolidge Carried 20 Counties

Of the 44 counties more than half complete, President Coolidge carried twenty by a narrow margin except in Sioux Falls and Black Hills, and Senator Johnson carried 24.

All the counties going to Senator Johnson gave him enormous leads, half of them going to the Californian two to one and Dueul county going three to one for Johnson.

The vote ran about seventy per cent of normal in most of the city districts.

In Mitchell and Black Hills, however, a record primary vote was cast.

The country vote was only about fifty per cent of normal and small towns ran about sixty per cent of normal.

Wind Spreads Cotton Seed

The wind plays an important part in spreading the numerous down-covered seeds when the cotton plant is not systematicaly cultivated, says Nature Magazine. The root penetrates deep into the soil. The plant responds readily to differences in climate, soil, and methods of growing.

Resolutions Adopted at Large Meeting of N. E. Brainerd Improvement League

CARL ZAPFFE GIVES ADDRESS

Refers to Facts Gained on School Conditions in Rotary Survey Made

The assembly room at the Lowell school was crowded on Tuesday evening with citizens from all parts of the city who are interested in the matter of a new high school for Brainerd, called in a mass meeting sponsored by the Northeast Brainerd Improvement League.

In a very interesting and instructive address, Carl Zapffe gave much valuable information on the proposed new high school, submitting figures which proved the overcrowded condition of the Brainerd schools, causing considerable dissatisfaction among students and teachers. Especially is this true in the high school, where it is lowering the standards of instruction given. The speaker complimented the teachers and school board on the efficient work they are doing under such a handicap. Mr. Zapffe stated further that:

The report prepared by the Boy's Work Committee of the Rotary club resulted from an investigation made when the committee undertook to develop a movement to persuade more eighth grade graduates to attend the high school and obtain a high school training. The very evident inability to accomodate a greater attendance necessitated investigating what the normal future influx of students would be and from what parts of the town they would come.

This developed into an investigation of all districts, all schools and attendance records of several years past; also the growth of Brainerd the distribution of homes and the routes of travel. In this way, the unfavorableness of the present high school site as it affects the big majority of students attending became apparent.

With the over crowding now existing in nearly all schools, the future use of the present high school building as a grade school and a junior high school showed the good use the present building would afford for grade students and not be a loss to the community.

The report was read word for word, the same as it was presented to the school board, and no attempt was made by the committee last night to show partiality as to any part of the city. It was interested only in presenting the facts relating to the urgent need of a new building, and was desirous of leaving those facts with the citizens for their own use.

The report commented favorably on the economies shown by the board and the judicious expenditures of the monies and it pointed out how the Brainerd school district had been handicapped in past years by unfavorable or inadequate state legislation.

Centers of Population

One part of the report was devoted to balancing the wards against one another on the basis of homes in each ward. The assumption is that where the homes are, there are and will be the children. Even if the number of children in the homes vary from year to year, for long periods the balance will remain in favor of the centers established.

The method used was based on special surveys of homes in each ward. Those centers were described as:

First ward, one block west of Lincoln school.

Second ward, one block south of Whittier school.

Third ward, one and one half blocks west of Lowell school.

Fourth ward, one block southwest of Harrison school.

Fifth ward, one block west of Washington school.

West Brainerd, two blocks west of Riverside school.

The centers measure distance from the high school as follows:

First ward—¼ mile.
Second ward—3-5 miles.
Third ward—1 and 1-3 miles.
Fourth ward—2-5 miles.
Fifth ward—1-12 miles.
West Brainerd—1 mile.

The center for the whole city, by balancing all districts, was shown to be the extreme southeast corner of the Second ward, in the hollow south of the fill.

Attendance at the high school, by wards, was found to be as follows:

	Jan. 1922	March 1924	1924 %
First ward	24	36	9.0
Second ward	109	130	32.4
Third ward	78	106	26.4
Fourth ward	58	72	18.0
Fifth ward	61	57	14.2
Country	58	75	
Total	388	476	100

There has been a constant and large increase in percentages for six years for the second and third wards. The fourth ward gained a little. The first ward was stationary and the fifth ward has been losing heavily.

A diagram was presented to show the effect of a poorly located high school, with respect to the number of students from each ward, and the distances walked by these students. It showed that the second and third ward students combined were nearly three times as far away from the present site as were the first, fourth and fifth ward students.

It showed that in 1923, 57 per cent of the city students of the high school came from the north side wards, and that this year it figured 59 per cent. Country students were disregarded because they room and board in different parts of the city.

Distance multiplied by attendance showed that the present site is three and one-half times more favorable to the south side students than the north side students, and the former now represent only 41 per cent of those attending.

At the conclusion of Mr. Zapffe's address a general discussion was engaged in by those present. Among the speakers from the various wards, who expressed their favorable opinion of the report and action taken were Rev. E. A. Cooke, Supt. W. C. Cobb, Mr. and Mrs. J. A. McKay.

The Northeast Brainerd Improvement league adopted a resolution that inasmuch as the housing and class room facilities and equipment of the local high school are at present wholly inadequate to care for the constantly growing demands made upon it by a steadily increasing enrollment, and because the present high school building is uncentrally and inconveniently located with reference to the attendance from the various quarters of the school district, the board of education, in its effort to find a solution to the problem, be requested to submit at an early date to the voters of Brainerd an opportunity to express a choice of several sites to be stated by the board on the ballots.

It was further asked in the resolution that if authorized by the voters, the site receiving the majority of votes cast be the one upon which the proposed new high school shall be located.

A rising vote of thanks was extended to Mr. Zapffe for presenting the need of a new high school in such a graphic and instructive manner.

Before the main subject was taken up, the league disposed of considerable other business in a very short time.

Mrs. J. H. Herbert reported a movement had been started to interest the boys and girls of Northeast Brainerd in gardening and the raising of flowers during the summer. The special committee handling the beautifying of the city contemplate having the contestants registered, their gardens inspected during the summer and in the fall it is planned to hold an exhibit and fair at the Lum park pavilion, at which time prizes will be awarded for different vegetables and flowers.

Further details are being worked out and it is expected will be announced in time for the children to get an early start.

A healthy scalp, and hair free from soap sediment, or stickiness, result from the use of JAP ROSE SOAP as a shampoo. Jap Rose imparts to the hair that desired fluffy and lustrous appearance.—Adv. 1tc

STORK WAS BUSY IN THIS COUNTY

Births For Past Year Numbered 742, Deaths Recorded Were 299

CERTIFIED TO STATE DEPT.

Statistics Compiled by Registrars in Cities, Villages and Townships

Seven hundred and forty-two births, and two hundred and ninety-nine deaths were recorded in Crow Wing county during the year 1923, as certified to the state department by the registrars in the cities, villages and townships of this county.

Brainerd heads the list with 347 births and 171 deaths. The township of Wolford shows a clean slate, there being no births and no deaths reported.

The following is the complete list as given to the clerk of the district court, W. A. M. Johnstone:

	Births	Deaths
Allen township	1	2
Baxter township	3	0
City of Brainerd	347	171

Brandow-Brown

Harry A. Brandow, of Ironton, and Miss Emma Brown, of Crosby, were married Wednesday morning at the parsonage of the First Congregational church in Brainerd, Rev. N. P. Olmsted officiating.

The couple was attended by Floyd B. Brandow and Miss Shirley M. Brandow, brother and sister of the groom.

Sacred Concert

For all lovers of sacred music there will be a concert on Sunday evening next, when the Augsburg Seminary Glee club will give a sacred concert at the Bethlehem Lutheran church. It is hoped everyone will avail themselves of this rare opportunity.

LUTHER LEAGUE PROGRAM

To be Given Thursday Evening at the Norwegian-Danish Lutheran Church

The Luther league of the Norwegian-Danish Lutheran church will meet on Thursday evening, March 27, entertained by Mr. and Mrs. Lars Meas and Mr. and Mrs. Henry Fossum.

The following program will be given:

Recitation	Edman Jernberg
Piano solo	Ida Petersen
Musical reading	Sigrid Stendal
Reading	Norva Knutson
Address	Rev. Henderson

Some Years After

Zev, the race-horse, is said to have been named after Mr. Zevely of Teapot Dome fame. Maybe In Memoriam was named after Albert B. Fall. —Savannah Morning News.

GIRL SCOUTS HIKE

Take Advantage of Spring Weather, Walk to Ahren's Hill and Enjoy Wiener Roast

On Saturday the Girl Scouts took advantage of the spring weather and made their first hike of the season, traveling about eight miles and coming back to Ahren's hill, where they enjoyed a wiener roast.

After the lunch the girls played games, which were interrupted when a farmer boy brought his horse to the hill and each girl scout insisted on having a ride.

They returned to the city about 5:30 o'clock, voting unanimously to stage another hike in the near future.

COUNTRY CLUB SEEKS MEMBERS

Brainerd Organization Sets Its Goal at 100 Members When Golf Season Opens

MILTON MAHLUM HEADS DRIVE

Club Has Now 66 Members, And No More Will be Able to Join After 100 Quota is Reached

The Brainerd Country club is this week starting its membership drive, with the goal set at one hundred members by the time the golf season officially opens. Milton Mahlum is chairman of the committee in charge of this drive, and hopes to gain the desired quota in a very short time.

The club now has sixty-six members, so that only thirty-four new ones are needed to bring the membership up to the desired total of one hundred. This is all that the constitution provides for, in fact.

When this number has been reached the club plans to do one of two things that have been suggested, either discontinue the new memberships entirely, or offer a limited number at double the charge that is now being made.

There is an advantage in joining the club at this time, it is pointed out, for the 1924 dues are to be remitted to all who join during the present membership drive.

The Brainerd Country club is said to be in the best condition, financially, of any club in this section of the state. It is absolutely self-supporting and financed on a basis that will never make necessary the levying of assessments, as some have feared.

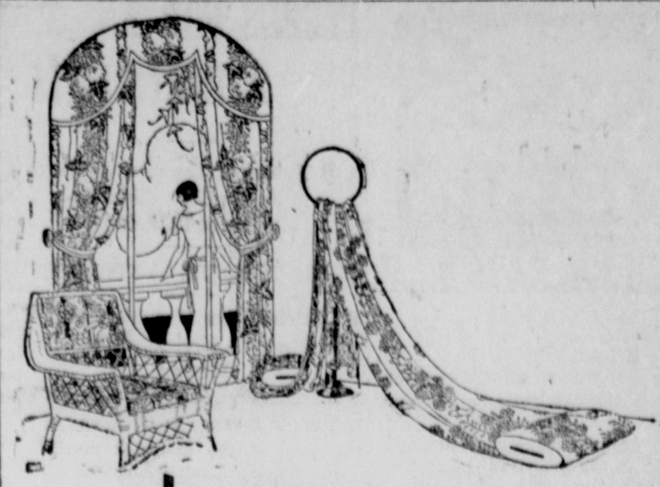

Early golf enthusiasts are already making use of the course, although they are requested to use only the fairways and to keep off the greens, which are very soft now that the frost is coming out of the ground. Maintenance work on the course will begin between April 1st and 15th, with an experienced caretaker in charge. The golf season opens officially on May 1st.

The report prepared by the Boy's Work Committee of the Rotary club resulted from an investigation made when the committee undertook to develop a movement to persuade more eighth grade graduates to attend the high school and obtain a high school training. The very evident inability to accomodate a greater attendance necessitated investigating what the normal future influx of students would be and from what parts of the town they would come.

This developed into an investigation of all districts, all schools and attendance records of several years past; also the growth of Brainerd the distribution of homes and the routes of travel. In this way, the unfavorableness of the present high school site as it affects the big majority of students attending became apparent.

With the over crowding now existing in nearly all schools, the future use of the present high school building as a grade school and a junior high school showed the good use the present building would afford for grade students and not be a loss to the community.

The report was read word for word, the same as it was presented to the school board, and no attempt was made by the committee last night to show partiality as to any part of the city. It was interested only in presenting the facts relating to the urgent need of a new building, and was desirous of leaving those facts with the citizens for their own use.

The report commented favorably on the economies shown by the board and the judicious expenditures of the monies and it pointed out how the Brainerd school district had been handicapped in past years by unfavorable or inadequate state legislation.

Centers of Population

One part of the report was devoted to balancing the wards against one another on the basis of homes in each ward. The assumption is that where the homes are, there are and will be the children. Even if the number of children in the homes vary from year to year, for long periods the balance will remain in favor of the centers established.

The method used was based on special surveys of homes in each ward. Those centers were described as:

First ward, one block west of Lincoln school.

Second ward, one block south of Whittier school.

Third ward, one and one half blocks west of Lowell school.

Fourth ward, one block southwest of Harrison school.

Fifth ward, one block west of Washington school.

West Brainerd, two blocks west of Riverside school.

The centers measure distance from the high school as follows:

First ward—¼ mile.
Second ward—3-5 miles.
Third ward—1 and 1-3 miles.
Fourth ward—2-5 miles.
Fifth ward—1-12 miles.
West Brainerd—1 mile.

The center for the whole city, by balancing all districts, was shown to be the extreme southeast corner of the Second ward, in the hollow south of the fill.

Attendance at the high school, by wards, was found to be as follows:

	Jan. 1922	March 1924	1924 %
First ward	24	36	9.0
Second ward	109	130	32.4
Third ward	78	106	26.4
Fourth ward	58	72	18.0
Fifth ward	61	57	14.2
Country	58	75	
Total	388	476	100

There has been a constant and large increase in percentages for six years for the second and third wards. The fourth ward gained a little. The first ward was stationary and the fifth ward has been losing heavily.

A diagram was presented to show the effect of a poorly located high school, with respect to the number of students from each ward, and the distances walked by these students. It showed that the second and third ward students combined were nearly three times as far away from the present site as were the first, fourth and fifth ward students.

It showed that in 1923, 57 per cent of the city students of the high school came from the north side wards, and that this year it figured 59 per cent. Country students were disregarded because they room and board in different parts of the city.

Distance multiplied by attendance showed that the present site is three and one-half times more favorable to the south side students than the north side students, and the former now represent only 41 per cent of those attending.

At the conclusion of Mr. Zapffe's address a general discussion was engaged in by those present. Among the speakers from the various wards, who expressed their favorable opinion of the report and action taken were Rev. E. A. Cooke, Supt. W. C. Cobb, Mr. and Mrs. J. A. McKay.

The Northeast Brainerd Improvement league adopted a resolution that inasmuch as the housing and class room facilities and equipment of the local high school are at present wholly inadequate to care for the constantly growing demands made upon it by a steadily increasing enrollment, and because the present high school building is uncentrally and inconveniently located with reference to the attendance from the various quarters of the school district, the board of education, in its effort to find a solution to the problem, be requested to submit at an early date to the voters of Brainerd an opportunity to express a choice of several sites to be stated by the board on the ballots.

It was further asked in the resolution that if authorized by the voters, the site receiving the majority of votes cast be the one upon which the proposed new high school shall be located.

A rising vote of thanks was extended to Mr. Zapffe for presenting the need of a new high school in such a graphic and instructive manner.

Before the main subject was taken up, the league disposed of considerable other business in a very short time.

Mrs. J. H. Herbert reported a movement had been started to interest the boys and girls of Northeast Brainerd in gardening and the raising of flowers during the summer. The special committee handling the beautifying of the city contemplate having the contestants registered, their gardens inspected during the summer and in the fall it is planned to hold an exhibit and fair at the Lum park pavilion, at which time prizes will be awarded for different vegetables and flowers.

Further details are being worked out and it is expected will be announced in time for the children to get an early start.

LUTHER LEAGUE PROGRAM

To be Given Thursday Evening at the Norwegian-Danish Lutheran Church

The Luther league of the Norwegian-Danish Lutheran church will meet on Thursday evening, March 27, entertained by Mr. and Mrs. Lars Meas and Mr. and Mrs. Henry Fossum.

The following program will be given:

Recitation	Edman Jernberg
Piano solo	Ida Petersen
Musical reading	Sigrid Stendal
Reading	Norva Knutson
Address	Rev. Henderson

Some Years After

Zev, the race-horse, is said to have been named after Mr. Zevely of Teapot Dome fame. Maybe In Memoriam was named after Albert B. Fall. —Savannah Morning News.

A healthy scalp, and hair free from soap sediment, or stickiness, result from the use of JAP ROSE SOAP as a shampoo. Jap Rose imparts to the hair that desired fluffy and lustrous appearance.—Adv. 1t

STORK WAS BUSY IN THIS COUNTY

Births For Past Year Numbered 742, Deaths Recorded Were 299

CERTIFIED TO STATE DEPT.

Statistics Compiled by Registrars in Cities, Villages and Townships

Seven hundred and forty-two births, and two hundred and ninety-nine deaths were recorded in Crow Wing county during the year 1923, as certified to the state department by the registrars in the cities, villages and townships of this county.

Brainerd heads the list with 347 births and 171 deaths. The township of Wolford shows a clean slate, there being no births and no deaths reported.

The following is the complete list as given to the clerk of the district court, W. A. M. Johnstone:

	Births	Deaths
Allen township	1	2
Baxter township	3	0
City of Brainerd	347	171
Bay Lake township	2	2
Center township	5	1
Village of Crosby	148	37
Crow Wing township	7	2
Village of Cuyuna	14	2
Daggett Brook twp	2	0
Dean Lake	2	1
Village of Deerwood	9	3
Deerwood township	3	10
Emily township	6	2
Fairfield township	3	0
Fort Ripley twp	4	0
Garrison township	9	4
Ideal township	3	3
Village of Ironton	25	12
Irondale township	17	8
Village of Jenkins	4	2
Jenkins township	3	0

Brandow-Brown

Harry A. Brandow, of Ironton, and Miss Emma Brown, of Crosby, were married Wednesday morning at the parsonage of the First Congregational church in Brainerd, Rev. N. P. Olmsted officiating.

The couple was attended by Floyd B. Brandow and Miss Shirley M. Brandow, brother and sister of the groom.

Sacred Concert

For all lovers of sacred music there will be a concert on Sunday evening next, when the Augsburg Seminary Glee club will give a sacred concert at the Bethlehem Lutheran church. It is hoped everyone will avail themselves of this rare opportunity.

GIRL SCOUTS HIKE

Take Advantage of Spring Weather, Walk to Ahren's Hill and Enjoy Wiener Roast

On Saturday the Girl Scouts took advantage of the spring weather and made their first hike of the season, traveling about eight miles and coming back to Ahren's hill, where they enjoyed a wiener roast.

After the lunch the girls played games, which were interrupted when a farmer boy brought his horse to the hill and each girl scout insisted on having a ride.

They returned to the city about 5:30 o'clock, voting unanimously to stage another hike in the near future.

COUNTRY CLUB SEEKS MEMBERS

Brainerd Organization Sets Its Goal at 100 Members When Golf Season Opens

MILTON MAHLUM HEADS DRIVE

Club Has Now 66 Members, And No More Will be Able to Join After 100 Quota is Reached

The Brainerd Country club is this week starting its membership drive, with the goal set at one hundred members by the time the golf season officially opens. Milton Mahlum is chairman of the committee in charge of this drive, and hopes to gain the desired quota in a very short time.

The club now has sixty-six members, so that only thirty-four new ones are needed to bring the membership up to the desired total of one hundred. This is all that the constitution provides for, in fact.

When this number has been reached the club plans to do one of two things that have been suggested, either discontinue the new memberships entirely, or offer a limited number at double the charge that is now being made.

There is an advantage in joining the club at this time, it is pointed out, for the 1924 dues are to be remitted to all who join during the present membership drive.

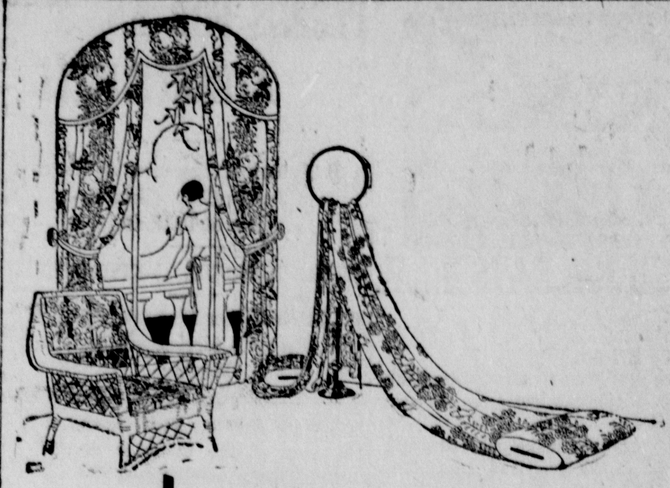

The Brainerd Country club is said to be in the best condition, financially, of any club in this section of the state. It is absolutely self-supporting and financed on a basis that will never make necessary the levying of assessments, as some have feared.

Early golf enthusiasts are already making use of the course, although they are requested to use only the fairways and to keep off the greens, which are very soft now that the frost is coming out of the ground. Maintenance work on the course will begin between April 1st and 15th, with an experienced caretaker in charge. The golf season opens officially on May 1st.

HENDRICKS INHERITS TOUGH JOB, SAYS H.L.F.

By HENRY L. FARRELL
United Press Sports Editor

New York, March 26.—Not so many weeks ago, Jack Hendricks was looking for a job. Even with records better than Hendricks had made, baseball hasn't many places for a man 48 years of age.

He had had one shot as a manager on the big-time at the head of the St. Louis Cards and he went back to Indianapolis in the American Association, where he remained for five years.

Giving up his job as Indianapolis manager because he couldn't agree with the club officials, he started looking for a job. He tried to interest capital in the Columbus American Association club, and failed. He looked into the Denver club and saw that it was not a good investment. He tried to put over a deal for the Toledo club, and failed.

With the approach of the 1924 season he had nothing in prospect and he accepted an offer from his close friend, Pat Moran, to act as assistant manager of the Cincinnati Reds, a team all wrapped up, tagged and shipped for the pennant.

Hendricks hardly had become acquainted with the players over whom he was to preside as assistant manager when Moran, his friend and benefactor, broke down and died.

Hendricks, after these few weeks of hectic jumping about, now finds himself the manager of a team that was the choice of the majority of the experts to win the National League pennant.

"Very lucky, Hendricks is!" you might say.

But is he lucky?

If you want to figure that he got himself a good job, you might say that, in Moran's death was evidenced again the soundness fo the logic behind the old saw that, "It is an ill wind that blows no one good."

Hendricks, however, is not in baseball for a year's salary. He does not have to work. Getting on with a major league club represented to him the opportunity, cherished in secret, to refute the saying that he was a good minor league manager, but he wasn't fast enough for the big leagues.

For any credit that Hendricks may get out of the handling of the Reds the coming season, he will not be lucky. He can't get any credit.

If the Reds win the pennant, he will hear: "They should have won. He took a team that was willed to him and that could have won without a manager."

If the Reds do not win the pennant, it will be said of him: "He's no good. If he couldn't win with that team, he couldn't win with any."

First Use of Wool

Undoubtedly the first use of wool to keep man warm was when one of our ancestors threw his sheepskin garment about him and fared forth with his club to get his dinner, says Nature Magazine. The industry of growing wool is, without doubt, the oldest known to the world, even antedating husbandry as an improved art.

Anita Stewart and Robert Frazer in
"THE LOVE PIKER"

At the New Park for three days, tonight, Thursday and Friday

Eileen Percy and Robert Cain in the Paramount Picture
"Children of Jazz"

Four Prominent Screen Players in Featured Roles

Embracing in its story many situations of dramatic power and thrill "Children of Jazz," a new Paramount picture featuring Theodore Kosloff, Ricardo Cortez, Robert Cain and Eileen Percy, will be the feature attraction at the Lyceum Theatre tonight and Thursday.

The story deals with the jazz existence of Babs Weston, daughter of a financier, who becomes engaged to three men simultaneously. Rickard Forestall, son of a man who maintains the social ideals and customs of the folk of the 1850's, is devoted to her, but when he hears of her escapades, he denounces and quits her.

PLEADS FOR AN ATHLETIC FIELD

J. P. Anderson, Treasurer of Northern Pacific Shop, Gives Review of Baseball

CITES MISSOULA EXPERIENCE

No Baseball Can Flourish Unless it Has an Athletic Park For Playing

J. P. Anderson, treasurer of the Northern Pacific shop team and chairman of the Chamber of Commerce athletic park committee gave the Dispatch this review of baseball conditions:

"In connection with the ball park and athletic field to be built this spring I wish to call your attention to the experience of Missoula, Montana, in providing a playing field. After the break-up of the Union Association the old Highland ball park, where our own Bullet Joe played his first professional ball and started on his road to fame and glory, was plowed up and turned into a potato field. This left the town without a ball park with the result that Missoula's interest in our greatest outdoor game lagged and finally died out.

This condition lasted for several years; finally Charlie Mitchell, N. P. roundhouse foreman, a former Brainerd boy, and other players and fans started a movement to provide a ball ground with the result that Missoula has, for the last four years, had one of the best city league ball parks in the west and during that time has maintained a city twilight league, varying from four to six teams who have consistantly furnished the fans with a high grade of amateur ball. The teams are sponsored by the various business establishments who furnish the uniforms and paraphernalia. A regular schedule of three evening games a week is maintained during the summer; in addition Sunday and holiday games are played, the league teams rotating in their use of the grounds and playing a team from out of town. The proceeds from the regular games are placed in a common fund out of which is paid the cost of ground upkeep, umpiring, etc. At the end of the season the remaining amount is divided between the players. The proceeds from the extra games go to the team occupying the park who, of course, pay the expenses of the visiting club. The players while all amateur, as mentioned above play a high grade of ball with the result that interest is keen and the patronage splendid.

Thus, through the efforts of a few players and faithful fans, helped by the business people and the Chamber of Commerce, Missoula now has a finely equipped park where its citizens can meet together out of doors during the summer evenings and, in comfort enjoy watching its young men play the greatest of all out-door games.

The location of the park we are starting in Brainerd has advantages and possibilities of development beyond the average. For one, its central location makes it easily and quickly reached from any part of town. Also its bowl-like contour, with its large level bottom and sloping sides, makes it almost a natural stadium that, with a minimum outlay, can be converted into an ideal community playground. Not only can it be used for a baseball park during the summer but also it will adequately provide a long-needed field where our high school boys can play football in the fall. Again, later on, its generous size will permit, with a very little outlay, the building of a circular cinder track making the park available as a place to hold high and grade school track meets. Also there is plenty of space for horse shoe courts and kitten ball grounds. In fact, the location and natural advantages of the park makes it an ideal place to build a playground that will be a source of healthful, outdoor enjoyment to the whole town as well as a point of civic pride.

Last year, even without a suitable park, we had several good ball teams, among them being the Paper Mill team, the West side team, the Home Oil Company team and the Northern Pacific club. This year, with a good playing field we should be able to develop splendid teams and as a start I would suggest that the players and fans get together to form the organization of a city-league, appoint managers and select players for the teams comprising the league. Lets put Brainerd back on the map as a town of real ball talent; the home of clean sportsmen whose aim it is to develop fine sturdy boys and girls who will play whatever game they are in for real love of the sport and in a spirit of fairness.

One other word, as a tribute to one of Brainerd's sons who went out from the old town and by hard work, clean living and study made a name for his home and himself and who, when his vase seemed broken and useless—the cunning of his arm spent and gone, refused to be beaten but with pure nerve and the help of a loyal woman, fought his way back to the heights where he stands a shining example of Minnesota sportsmanship and grit, I suggest that we name our new park "Bush Field."

TWO HARBORS HIGH COACH IS FORMER CARLETON ATHLETE

Northfield, March 26.—When Two Harbors high school won the state basketball championship a great deal of credit went to Coach Louis Benson, who conducted the range team through its successful season.

Benson, who has had a varied experience in athletics, is a 1922 graduate of Carleton college where he participated regularly in a number of sports. Playing third base in baseball, he is credited as the best infielder in the history of that institution, while in football he filled an end position very creditable.

Although this is Benson's first attempt at coaching basketball, he has admirably demonstrated his ability along this line. A really excellent coach with a positive ability in getting his ideas across, Benson ought to do well in his latest phase of athletic endeavor.

CARLETON COLLEGE TRACK SCHEDULE

April 26—Drake Relays at Sioux Falls, S. D.
May 3—Dakota Relays.
May 10—Cornell at Carleton.
May 17—Interscholastic Meet at Northfield.
May 24—State Meet at Hamline.
May 31—Mid-West Conference Meet at Beloit.

Northfield, March 26.—Carleton's track squad is actively engaged in preparation for a busy season, as indicated by their completed schedule.

A number of last year's letter men are in training again, including Kolderie, Oleson, Dansingberg, R. Marsh, Frost, Drill, Sprandel, Burns, Dodgers, Lufkin, Street, and D. Anderson. A wealth of new material in addition, which gives every promise of equaling the efforts of the letter men, will permit Carleton to make an excellent showing this year.

The relay teams which Coach Millen will send to the Drake and Dakota relays will be composed from the following men: One-half milers: Frist, Boehmke, Anderson, Dansingburg, Lufkin, M. Nelson and J. Nelson. One milers: Burns, March, Lufkin, Cruwell, Best, Dunn, D. March. Two milers: Swanson, Olson, March, Kolderie, Montgomery.

First honors in the annual interclass track meet went to the sophomore class who ran up a total of 61½ points against the seniors 37½, the juniors 26, and the freshmen 12.

Seven indoor records were broken by the following men: High jump: Lindesmith. Broad jump: J. Nelson. 220: Boehmke. Half mile: Swanson. Mile: Kolderie. 440: R. March. Shot Put: Drill.

The pole vault was won by Lindesmith; the 30 yard low and high hurdles by Dansingburg, and the 30 yard dash came out a tie between Nelson and Anderson.

New Orleans, March 26.—Rookie pitchers were given detailed instructions at the New York Yankees, headquarters Monday. Bob Shawkey and Herb Pennock helped Huggins to show Gaston, Owen, Pipgrass, Roettger and Thompson some of the stuff they will have to develop to retain berths with the world champions.

Now Is The Time To Buy Cranberries For Preserving

Then you can enjoy the delicious tart flavor of this health-giving fruit every day in the year.

Cranberries are reasonable in price. They are easily and quickly prepared—no peeling—no cores—no waste. *Economical!*

You can make 10 tumblers of jelly with 2½ pounds of sugar and 8 pounds of cranberries! Try this recipe:

Cranberry Jelly

Cook until soft the desired quantity of cranberries with 1½ pints of water for each two quarts of berries. Strain the juice through a jelly bag.

Measure the juice and heat it to the boiling point. Add one cup of sugar for every two cups of juice; stir until the sugar is dissolved; boil briskly for five minutes; skim, and pour into glass tumblers, porcelain or crockery molds.

Always cook cranberries in porcelain-lined, enameled, or aluminum vessels.

To be sure of a selection of the choicest varieties—ask for **Eatmor Cranberries.**

A folder containing recipes for other ways to use and preserve cranberries, sent free.

John L. Smith Lumber Co., Nisswa, Minn. 9305-248t4ws

SOUR STOMACH IS CAUSED BY ACIDS

Says We Must Keep Feet Dry, Avoid Exposure, Eat No Sweets

Stay off the damp ground, avoid exposure, keep feet dry, eat no sweets of any kind for a while, drink lots of water and above all take a spoonful of Jad Salts occasionally to help keep down uric acid and toxic acids.

Rheumatism is caused by poison toxins, called acids, which are generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine. The pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed, thus forcing the kidneys to do double work; they become weak and sluggish and fail to eliminate this poison, which keeps accumulating and circulating through the system, eventually settling in the joints and muscles, causing stiffness, soreness and pain, called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is helpful to neutralize acidity, remove body waste, also to stimulate the kidneys, thus helping to rid the blood of these rheumatic poisons.

Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia, and is used with excellent results by thousands of folks who are subject to rheumatism.—Advt.

Butcher Rejoices Over Wife's Recovery

"My wife suffered for five years and practically lived on toast and hot water. Doctors said she would have to be operated on for gall stones. A lady advised her to try Mayr's Wonderful Remedy and after taking 4 bottles over two years ago, she has been entirely well since." It removes the catarrhal mucus from the intestinal tract, and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded at Johnson's Pharmacy and druggists everywhere.—Advt.

HENDRICKS INHERITS TOUGH JOB, SAYS H.L.F.

By HENRY L. FARRELL
United Press Sports Editor

New York, March 26.—Not so many weeks ago, Jack Hendricks was looking for a job. Even with records better than Hendricks had made, baseball hasn't many places for a man 48 years of age.

He had had one shot as a manager on the big-time at the head of the St. Louis Cards and he went back to Indianapolis in the American Association, where he remained for five years.

Giving up his job as Indianapolis manager because he couldn't agree with the club officials, he started looking for a job. He tried to interest capital in the Columbus American Association club, and failed. He looked into the Denver club and saw that it was not a good investment. He tried to put over a deal for the Toledo club, and failed.

With the approach of the 1924 season he had nothing in prospect and he accepted an offer from his close friend, Pat Moran, to act as assistant manager of the Cincinnati Reds, a team all wrapped up, tagged and shipped for the pennant.

Hendricks hardly had become acquainted with the players over whom he was to preside as assistant manager when Moran, his friend and benefactor, broke down and died.

Hendricks, after these few weeks of hectic jumping about, now finds himself the manager of a team that was the choice of the majority of the experts to win the National League pennant.

"Very lucky, Hendricks is!" you might say.

But is he lucky?

If you want to figure that he got himself a good job, you might say that, in Moran's death was evidenced again the soundness fo the logic behind the old saw that, "It is an ill wind that blows no one good."

Hendricks, however, is not in baseball for a year's salary. He does not have to work. Getting on with a major league club represented to him the opportunity, cherished in secret, to refute the saying that he was a good minor league manager, but he wasn't fast enough for the big leagues.

For any credit that Hendricks may get out of the handling of the Reds the coming season, he will not be lucky. He can't get any credit.

If the Reds win the pennant, he will hear: "They should have won. He took a team that was willed to him and that could have won without a manager."

If the Reds do not win the pennant, it will be said of him: "He's no good. If he couldn't win with that team, he couldn't win with any."

First Use of Wool

Undoubtedly the first use of wool to keep man warm was when one of our ancestors threw his sheepskin garment about him and fared forth with his club to get his dinner, says Nature Magazine. The industry of growing wool is, without doubt, the oldest known to the world, even antedating husbandry as an improved art.

Anita Stewart and Robert Frazer in
"THE LOVE PIKER"

At the New Park for three days, tonight, Thursday and Friday

Eileen Percy and Robert Cain in the Paramount Picture
"Children of Jazz"

Four Prominent Screen Players in Featured Roles

Embracing in its story many situations of dramatic power and thrill "Children of Jazz," a new Paramount picture featuring Theodore Kosloff, Ricardo Cortez, Robert Cain and Eileen Percy, will be the feature attraction at the Lyceum Theatre tonight and Thursday.

The story deals with the jazz existence of Babs Weston, daughter of a financier, who becomes engaged to three men simultaneously. Rickard Forestall, son of a man who maintains the social ideals and customs of the folk of the 1850's, is devoted to her, but when he hears of her escapades, he denounces and quits her.

PLEADS FOR AN ATHLETIC FIELD

J. P. Anderson, Treasurer of Northern Pacific Shop, Gives Review of Baseball

CITES MISSOULA EXPERIENCE

No Baseball Can Flourish Unless it Has an Athletic Park For Playing

J. P. Anderson, treasurer of the Northern Pacific shop team and chairman of the Chamber of Commerce athletic park committee gave the Dispatch this review of baseball conditions:

"In connection with the ball park and athletic field to be built this spring I wish to call your attention to the experience of Missoula, Montana, in providing a playing field. After the break-up of the Union Association the old Highland ball park, where our own Bullet Joe played his first professional ball and started on his road to fame and glory, was plowed up and turned into a potato field. This left the town without a ball park with the result that Missoula's interest in our greatest outdoor game lagged and finally died out.

This condition lasted for several years; finally Charlie Mitchell, N. P. roundhouse foreman, a former Brainerd boy, and other players and fans started a movement to provide a ball ground with the result that Missoula has, for the last four years, had one of the best city league ball parks in the west and during that time has maintained a city twilight league, varying from four to six teams who have consistantly furnished the fans with a high grade of amateur ball. The teams are sponsored by the various business establishments who furnish the uniforms and paraphernalia. A regular schedule of three evening games a week is maintained during the summer; in addition Sunday and holiday games are played, the league teams rotating in their use of the grounds and playing a team from out of town. The proceeds from the regular games are placed in a common fund out of which is paid the cost of ground upkeep, umpiring, etc. At the end of the season the remaining amount is divided between the players. The proceeds from the extra games go to the team occupying the park who, of course, pay the expenses of the visiting club. The players while all amateur, as mentioned above play a high grade of ball with the result that interest is keen and the patronage splendid.

Thus, through the efforts of a few players and faithful fans, helped by the business people and the Chamber of Commerce, Missoula now has a finely equipped park where its citizens can meet together out of doors during the summer evenings and, in comfort enjoy watching its young men play the greatest of all out-door games.

The location of the park we are starting in Brainerd has advantages and possibilities of development beyond the average. For one, its central location makes it easily and quickly reached from any part of town. Also its bowl-like contour, with its large level bottom and sloping sides, makes it almost a natural stadium that, with a minimum outlay, can be converted into an ideal community playground. Not only can it be used for a baseball park during the summer but also it will adequately provide a long-needed field where our high school boys can play football in the fall. Again, later on, its generous size will permit, with a very little outlay, the building of a circular cinder track making the park available as a place to hold high and grade school track meets. Also there is plenty of space for horse shoe courts and kitten ball grounds. In fact, the location and natural advantages of the park makes it an ideal place to build a playground that will be a source of healthful, outdoor enjoyment to the whole town as well as a point of civic pride.

Last year, even without a suitable park, we had several good ball teams, among them being the Paper Mill team, the West side team, the Home Oil Company team and the Northern Pacific club. This year, with a good playing field we should be able to develop splendid teams and as a start I would suggest that the players and fans get together to form the organization of a city-league, appoint managers and select players for the teams comprising the league. Lets put Brainerd back on the map as a town of real ball talent; the home of clean sportsmen whose aim it is to develop fine sturdy boys and girls who will play whatever game they are in for real love of the sport and in a spirit of fairness.

One other word, as a tribute to one of Brainerd's sons who went out from the old town and by hard work, clean living and study made a name for his home and himself and who, when his vase seemed broken and useless—the cunning of his arm spent and gone, refused to be beaten but with pure nerve and the help of a loyal woman, fought his way back to the heights where he stands a shining example of Minnesota sportsmanship and grit, I suggest that we name our new park "Bush Field."

TWO HARBORS HIGH COACH IS FORMER CARLETON ATHLETE

Northfield, March 26.—When Two Harbors high school won the state basketball championship a great deal of credit went to Coach Louis Benson, who conducted the range team through its successful season.

Benson, who has had a varied experience in athletics, is a 1922 graduate of Carleton college where he participated regularly in a number of sports. Playing third base in baseball, he is credited as the best infielder in the history of that institution, while in football he filled an end position very creditable.

Although this is Benson's first attempt at coaching basketball, he has admirably demonstrated his ability along this line. A really excellent coach with a positive ability in getting his ideas across, Benson ought to do well in his latest phase of athletic endeavor.

Now Is The Time To Buy Cranberries For Preserving

Then you can enjoy the delicious tart flavor of this health-giving fruit every day in the year.

Cranberries are reasonable in price. They are easily and quickly prepared—no peeling—no cores—no waste. *Economical!*

You can make 10 tumblers of jelly with 2½ pounds of sugar and 8 pounds of cranberries! Try this recipe:

Cranberry Jelly

Cook until soft the desired quantity of cranberries with 1½ pints of water for each two quarts of berries. Strain the juice through a jelly bag.

Measure the juice and heat it to the boiling point. Add one cup of sugar for every two cups of juice; stir until the sugar is dissolved; boil briskly for five minutes; skim, and pour into glass tumblers, porcelain or crockery molds.

Always cook cranberries in porcelain-lined, enameled, or aluminum vessels.

To be sure of a selection of the choicest varieties—ask for **Eatmor Cranberries.**

A folder containing recipes for other ways to use and preserve cranberries, sent free.

CARLETON COLLEGE TRACK SCHEDULE

April 26—Drake Relays at Sioux Falls, S. D.
May 3—Dakota Relays.
May 10—Cornell at Carleton.
May 17—Interscholastic Meet at Northfield.
May 24—State Meet at Hamline.
May 31—Mid-West Conference Meet at Beloit.

Northfield, March 26.—Carleton's track squad is actively engaged in preparation for a busy season, as indicated by their completed schedule.

A number of last year's letter men are in training again, including Kolderie, Oleson, Dansingberg, R. Marsh, Frost, Drill, Sprandel, Burns, Dodgers, Lufkin, Street, and D. Anderson. A wealth of new material in addition, which gives every promise of equaling the efforts of the letter men, will permit Carleton to make an excellent showing this year.

The relay teams which Coach Millen will send to the Drake and Dakota relays will be composed from the following men: One-half milers: Frist, Boehmke, Anderson, Dansingburg, Lufkin, M. Nelson and J. Nelson. One milers: Burns, March, Lufkin, Cruwell, Best, Dunn, D. March. Two milers: Swanson, Olson, March, Kolderie, Montgomery.

First honors in the annual interclass track meet went to the sophomore class who ran up a total of 61½ points against the seniors 37½, the juniors 26, and the freshmen 12.

Seven indoor records were broken by the following men: High jump: Lindesmith. Broad jump: J. Nelson. 220: Boehmke. Half mile: Swanson. Mile: Kolderie. 440: R. March. Shot Put: Drill.

The pole vault was won by Lindesmith; the 30 yard low and high hurdles by Dansingburg, and the 30 yard dash came out a tie between Nelson and Anderson.

New Orleans, March 26.—Rookie pitchers were given detailed instructions at the New York Yankees, headquarters Monday. Bob Shawkey and Herb Pennock helped Huggins to show Gaston, Owen, Pipgrass, Roettger and Thompson some of the stuff they will have to develop to retain berths with the world champions.
